

Be The Difference.

COEN 4840 / EECE 5840 – Computer Security

Fred J. Frigo, Ph.D.

Spring 2022

Course Description:

Introduction to the important issues in computer security, including cryptography, program security, operating system security, database security, and network security. Also discusses the legal, ethical and privacy issues that arise in computer security. Programming projects enable the student to practice implementing many of the security measures discussed in class.

Additional Details:

We will explore various cybersecurity exploits & analyze strategies for the protection of computer systems and information from harm, theft, and unauthorized use. The goal of homework and projects will be to gain a deeper understanding of the ideas and concepts of this course through actual implementation in such areas as: network configuration, TCP/IP, firewalls, encryption, certificates, SYSLOG, TLS, SPLUNK, Wireshark, etc.

Location & Schedule:

Class meets Tuesdays & Thursdays: 5:00pm-6:15pm

In person - Olin 128 – or live stream available via Microsoft Teams.

Grading:

Homework and Projects: 60%

Mid-term exam: 20%

Final exam: 20%

Recommended Text:

Computer Security - Principles and Practice – 4th Edition
