MCC Requirement	Course No.	EE Electives	Course No.	Course No.	Course No.
1. DSCV		Electronic Devices & Systems			
2. DSCV		Signals, Systems & Control			
3. DSCV		EM & Communications			
4. DSCV		Power & Energy			
5. WRIT ²		Computer HW & SW			
6. ESSV2 ²		Other Tech elective			

DEGREE REQUIREMENTS INCLUDE:

- Every required course
- Approved elective program.
- A "C" (2.0) or more average at Marquette
- A "C" (2.0) or more average in Engineering courses
- A minimum of 135 semester hours
- No course may be taken for credit without the required prerequisite(s)
- All substitutions and/or departures from stated curriculum must be approved in writing in advance

Notes:

Marquette Common Core (MCC)

(1) The four courses in the Discovery Tier (DSCV) of the MCC must be completed in the same theme and include the following content areas: Humanities (HUM), Social Science (SSC), Natural Science and Mathematics (NSM) and one elective (ELE), which is an additional course from any of the three content areas. A maximum of two courses in the Discovery Tier can apply towards a primary major.

(2) Students must also complete the Writing Intensive (WRIT) and Engaging Social System and Values 2 (ESSV2) requirements of the MCC. These requirements can be fulfilled through designated courses in the Discovery Tier or other degree requirements.

Electrical Engineering Major

(3) The six EE Electives must satisfy both a breadth and a depth requirement. To satisfy the breadth requirement, the student must take EE electives in at least three of the following five areas: Electronic Devices and Systems; Signals, Systems and Control; Electromagnetic Fields and Communication; Power and Energy Systems; and Computer Hardware and Software. To satisfy the depth requirement, the student must take at least three EE electives in one of the aforementioned areas. A course listed in two concentration areas may be counted toward only one elective.

(4) The science/math elective can be fulfilled with any upper division math or physics course (except PHYS 4031 Electricity and Magnetism 1) or any biology or chemistry course for which the prerequisite requirements are met.

Elective Choices

The breadth requirement: Students must choose at least one course from at least 3 different concentration areas.

The depth requirement: Students must choose at least 3 courses from one concentration area.

Courses listed in multiple concentration areas count in ONLY one concentration area.

Concentration areas:

Electronic Devices and Systems		
	EECE 4410	Integrated Microelectronic Circuits
	EECE 4740	Advanced VHDL and FPGA Design
	ELEN 4430	Physical Principles of Solid State Devices
	ELEN 4460	Sensor Devices: Theory, Design, and Application
	ELEN 4490	Developments in Devices
	ELEN 4565	Optical Fiber Communications
Signals, Systems and Control		
	ELEN 4310	Control Systems
	ELEN 4320	Digital Control Systems
